

Makanak

Find Properties Near You

Requirements Specification Document

Version 1.0 · April 2026

Prepared for: Makanak Product Team

Table of Contents

- [1](#) Stakeholder Analysis
- [2](#) User Stories & Use Cases
- [3](#) Functional Requirements
- [4](#) Non-Functional Requirements

1. Stakeholder Analysis

Key actors who interact with or are affected by the Makanak platform.

Primary

Property Seeker

- Browse and filter listings by location, price, and type
- View property details, photos, and floor plans
- Save favourites and compare options
- Contact landlords or agents directly
- Get notified of new matching listings

Primary

Property Owner / Landlord

- List properties quickly with media uploads
- Manage and update listing details
- Receive and respond to enquiries
- Track listing views and engagement
- Promote listings for increased visibility

Primary

Real Estate Agent / Broker

- Manage a portfolio of multiple listings
- Access verified lead contacts
- Build a professional agency profile
- Run analytics on listing performance

Secondary

Platform Administrator

- Moderate listings for policy compliance
- Manage user accounts and permissions
- Monitor platform health and analytics
- Handle disputes and support tickets

Secondary

Advertiser / Partner

- Place targeted ads to relevant audiences
- Access campaign performance metrics
- Integrate mortgage or services offers

Indirect

Regulatory Body

- Ensure data privacy compliance (GDPR / local law)
- Enforce real estate listing accuracy standards
- Audit user data handling practices

2. User Stories & Use Cases

Scenarios illustrating how key users interact with Makanak.

US-01 Seeker

As a property seeker, I want to search for available rentals near my current location so that I can find housing options within a convenient distance.

Acceptance criteria: Map view displays results within a selectable radius; list view sorts by distance; results update as I pan the map.

US-02 Seeker

As a property seeker, I want to filter listings by price range, number of bedrooms, and property type so that I only see options that match my needs.

Acceptance criteria: Filters are persistent across sessions; applied filters are displayed as removable chips; result count updates in real time.

US-03 Seeker

As a property seeker, I want to save favourite listings to a personal wishlist so that I can revisit and compare them later.

Acceptance criteria: Heart icon on each card toggles save state; wishlist is synced to account and accessible offline.

US-04 Owner

As a property owner, I want to create a listing with photos, description, and pricing so that potential tenants can discover my property.

Acceptance criteria: Multi-image upload with drag-to-reorder; listing goes live after admin verification; owner receives email confirmation.

US-05 Owner

As a property owner, I want to receive in-app and email notifications when someone enquires about my listing so that I can respond promptly.

Acceptance criteria: Notification delivered within 60 seconds of enquiry; owner can reply directly from the notification email.

US-06 Agent

As a real estate agent, I want to manage multiple property listings from a single dashboard so that I can efficiently handle my entire portfolio.

Acceptance criteria: Dashboard shows aggregate stats (views, leads, active listings); bulk edit and status toggle available.

US-07 Admin

As a platform admin, I want to review and approve or reject submitted listings so that fraudulent or non-compliant content is kept off the platform.

Acceptance criteria: Moderation queue with reason codes for rejection; rejected listings trigger an owner notification with explanation.

US-08 Seeker

As a property seeker, I want to set up a saved search alert so that I am notified when new listings matching my criteria are published.

Acceptance criteria: Alert delivered via push or email; frequency configurable (instant, daily, weekly); unsubscribe in one tap.

3. Functional Requirements

Features and behaviours the system must support.

AUTHENTICATION & ACCOUNTS

ID	Requirement	Priority
FR-01	Users must be able to register via email/password, Google OAuth, or Apple Sign-In.	High
FR-02	The system must support distinct user roles: Seeker, Owner, Agent, and Admin with appropriate access controls.	High
FR-03	Password reset via email OTP must be available.	Medium

PROPERTY DISCOVERY

ID	Requirement	Priority
FR-04	Users must be able to search listings by location (text or GPS), property type, price range, and number of rooms.	High
FR-05	Search results must be displayable in list view and interactive map view with clustered markers.	High
FR-06	Each listing detail page must show images, description, amenities, location map, price, and contact options.	High
FR-07	Users must be able to save listings to a personal wishlist and remove them at any time.	Medium
FR-08	Users must be able to create saved searches and receive alerts when new matching listings appear.	Medium

LISTING MANAGEMENT

ID	Requirement	Priority
FR-09	Owners and Agents must be able to create, edit, pause, and delete property listings.	High
FR-10	The system must support upload of up to 20 images per listing with drag-to-reorder functionality.	High
FR-11	New listings must enter a moderation queue and only appear publicly after admin approval.	High
FR-12	Owners must be able to view per-listing analytics: view count, enquiry count, wishlist saves.	Medium

ID	Requirement	Priority
FR-13	The system must support featured/promoted listings with higher visibility.	Low

MESSAGING & ENQUIRIES

ID	Requirement	Priority
FR-14	Seekers must be able to send enquiries to Owners or Agents directly from the listing page.	High
FR-15	Both parties must receive push and email notifications for new messages and replies.	High
FR-16	An in-app messaging thread must persist the full conversation history between a Seeker and a listing contact.	Medium

ADMIN & MODERATION

ID	Requirement	Priority
FR-17	Admins must have a moderation dashboard to approve, reject, or flag listings with reason codes.	High
FR-18	Admins must be able to suspend or permanently ban user accounts.	Medium
FR-19	Users must be able to report a listing as fraudulent; reports must appear in the admin queue.	Medium

4. Non-Functional Requirements

Quality attributes governing performance, security, usability, and reliability.

Performance

< 2 s	Page load on a 3G connection
< 300 ms	Search results API response time
< 60 s	Enquiry notification delivery
5,000+ users	Concurrent users supported

Security

HTTPS / TLS 1.3	All data in transit encrypted
Bcrypt / Argon2	Password hashing standard
GDPR compliant	User data privacy & right-to-delete
OWASP Top 10	All vulnerabilities must be mitigated
Role-based ACL	Strict permission enforcement

Usability

Mobile-first	Responsive across all screen sizes
WCAG 2.1 AA	Accessibility compliance
Arabic + English	Full RTL and LTR language support
<= 3 taps	Reach any listing from the home screen
< 2 minutes	New user onboarding completion time

Reliability

99.9% uptime	Monthly SLA target
< 4 hr RTO	Recovery time objective
Daily backups	With 30-day retention
PWA support	Core search available offline
